Likin M B

likinmb83@gmail.com 6363099213 Hootagalli, Mysuru LinkedIn GitHub

PROFILE

Computer Science (AI-ML) undergraduate with strong foundations in **Data structures & Algorithms**, **Object Oriented Programming, Backend Development**, **REST API Development**, **SQL** and **AI** applications. Adept at quickly learning, applying new technologies and passionate about building scalable software systems and solving real-world engineering problems.

EDUCATION

Vidyavardhaka College of Engineering, Mysore 2023 – 2027
Computer Science (AI-ML) and Engineering - **8.91 CGPA**

Pramati Hillview Academy, Mysuru 2020 – 2023
PCMB - **86.6 % (CBSE)** 10th - **92.2 % (CBSE)**

SKILLS

Programming Languages
C++, Python, C

Web and Backend
React, Flask, FastAPI, REST APIs, JWT, CRUD, Authentication

Core CS
DSA, DBMS, Operating Systems, Computer Networks, OOP, HTML, Git, GitHub, Problem Solving

Databases
SQL(MySQL), NoSQL(MongoDB)

PROJECTS

Hospital Management System | React, Flask, MySQL
- Designed full-stack web application with **role-based modules** for patient records, appointments, billing, and doctor management using **React, Flask, REST APIs,** and **MySQL**.
- Designed and integrated **CRUD APIs, RESTful backend architecture**, SQL queries, backend validation and frontend-backend integration to automate hospital workflows and ensure efficient data management.

Smart Platform Community for Sustainability (LLM-powered)
- Built an **AI-powered sustainability platform** leveraging **Retrieval-Augmented Generation (RAG)** and **LLaVA** for intelligent image-based verification of community activities.
- Technologies: Python, LLMs, RAG, LLaVA, AI Models, Backend Development, Flask, Vector Retrieval.

Logistic Command Voice Intelligence
- Developed an **AI-powered voice assistant** for logistics automation using **FastAPI, LangGraph, Llama 3.1,** and **Vapi API** to streamline supply chain operations.
- Integrated **Twilio, MongoDB** and backend APIs to enable voice interactions and workflow automation.

INVOLVEMENT

Club Core member - Vector Flow
• Led the event team in planning, coordinating, and executing club activities, ensuring smooth management and successful delivery of events.

Peer Tutor (Academic Mentorship)
• Provided peer tutoring in Data Structures & Algorithms, DBMS, Advanced Java, and Design & Analysis of Algorithms and assisted students in understanding core concepts, problem-solving techniques and exams.

ACHIEVEMENTS

CodeHunt Competition - 1st Prize
- Secured 1st place in National-level inter-college coding competition by solving problem-solving challenges.

CodeOfDuty Competition – 3rd Prize
- Achieved 3rd place in CodeOfDuty coding competition by solving algorithmic and programming challenges.

CodeBuddy Competition – Cash Prize
- Awarded a cash prize for outstanding performance in CodeBuddy contest, showcasing proficiency in DSA.
